Mobile management

Warning: You currently have some unmanaged users in your domain which means that your organization's data may not be fully secure.

With Google Mobile Management, you get:

- **Screen lock** required to unlock mobile devices
- **Selective account wipe** of corporate data on mobile devices
- **Inventory management** of all mobile devices in your organization
- **Mobile app management** for Android users in your organization

Choose mobile management option:

☒ Please enable Google Mobile Management to manage all mobile devices in my domain (Recommended)

☐ I want to keep my current configuration
